

# GREENLIGHT GURU + JIRA

Enable software development teams to leverage the agile functionality of JIRA when building software application or components while maintaining traceability to Design Controls and Risk Management processes throughout a devices lifecycle.

## FEATURES

Easily link JIRA Issues to any Design Controls in Greenlight Guru

Navigate seamlessly between linked Design Controls and any associated JIRA Issues

View key details about linked items in Greenlight Guru as the work progresses in JIRA

## BENEFITS

Achieve visibility between your Design Control and Risk Management system of record and the software implementation being tracked in JIRA

Reduce compliance risk by ensuring the appropriate JIRA artifacts are captured in your QMS

Allow your software development teams the freedom to execute work in JIRA as they see fit
